FOR IMMEDIATE RELEASE
ACTION ALERT

6/30/17 – EDWARD C NOONAN, Former 2012 & 2016 Presidential Candidate alert:

“In Japan and South America there have been a rash of strong earthquakes in the last few days giving credence to the term ‘Ring of Fire’ that circles the Pacific Ocean. The seven quakes in Japan have been moving ever inward toward the center of the small island at the center or the trembling storm.

Closer to home scientists now say Yellowstone National Park is overdue to explode into the atmosphere. Yellowstone is a Super-Volcano and would bury Idaho, Montana and Wyoming in molten rock, ash and debris if it and when it finally erupts, which it will.”

There has been a lot of denial by the so-called experts that Yellowstone is in “angry mode” and the increased earthquake activity is nothing to be concerned about. However, for the last 25,000 years mankind has been dismal is predicting earthquakes and volcanos. The American Resistance Party urges all to be watchful and mindful. The signs are visible that something big is about to happen!
